CONTACTLESS HAND SANITIZER DISPENSER

Hand disinfection station, anti-bacterial anti-virus liquid dispenser.

Reception, secretariat, or main hall - these are the most popular places in your company, office or institution vulnerable for spreading COVID-19. Also, these are the most representative places, which are supposed to encourage your customers, clients, as well as your business partners to cooperation.

These are to show that you are professional, reliable and that your clients can rely on you.

Obligation to disinfect your hands before entering to our offices, companies, agencies, or institutions will not disappear quickly, and even after we deal with pandemic problems, duty should remain as a good habit. Our automatic contactless hand disinfectant dispensers fit into the professional, solid and secure institution and would be the best showcase of business you represent.

Available in different colours - the basic version is white. However, it is possible to adapt the colour of the dispenser to your preferences, or to the company you represent. Hand disinfection station may be equipped with the company's logo, or emblem of the institution, as well as could be covered all in company's recognizable colours.

Dedicated to all public, private and state institutions. communal offices, educational institutions, public offices, wherever people go: shopping centres, supermarkets, beauticians, hairdressers, libraries, schools, cultural centres, medical services etc.

For an additional fee we can
brand your contactless hand
sanitizer dispenser according
to your need.

SAMPLE PROJECT

SAMPLE PROJECT

CONTACTLESS – All you have to do is put your hands under the photoelectric cell sensor and the right dose of disinfecting mist will automatically appear on your hands. Depending on the settings, the dose may be higher or lower.

COMFORTABLE IN USE – large slot is not only comfortable, but also protects clothing from soiling.

IT DOES NOT REQUIRE PERMANENT ACCESS TO ELECTRICITY - so you do not need to use additional extension cords. 12V gel accumulator is sufficient for 1344 working hours without charging it.

DOSAGE ADJUSTMENT – it is possible to set the dosage. 1.2 ml is a standard and approximately sufficient for 4,000 doses, depending on the type and effectiveness of the liquid that is used.

IT WEIGHS ABOUT 30 kg - makes it very stable, and at the same time quite easy to move.

VERY SOLID CONSTRUCTION - made of dibond - a material composed of several aluminum plates connected by a polyethylene core. Extremely light and resistant to damage, weather conditions or corrosion.

Dimension - 163 cm x 32 cm x 30 cm.
